

C4. Short term mobility of students

Green advanced materials

started on 04.09.2021, NTNU Trondheim, Norway
2 participants, 30 days

Period of the mobility: 4th of September and 3th of October 2021

During the mobility, the students performed the dissertation activity in the lab of NTNU partner. The research topics belong to the area of biomass valorization with the final goal of developing green chemical materials. The students participated at the NMR course (KJ3021).
