IASI

Useful Local Information

Iasi is the capital of Moldavia, one of the most interesting regions of Romania, a land with specific traditions and a culture containing the root of CUCUTENI, almost 6000 years ago. Today the Moldavian universe is a synthesis of Romanian's history, always open to the great cultures of the world and adapting in time, their rich influences inside the Moldavian art and spiritual life. The traditional Moldavian style is remarkably integrated in the architectures of our famous churches and monasteries, small in size but rich in frescoes including spiritual and ethical connotations in each detail.

Over the past, history, culture and religious life have molded the city's unique character. Iasi boasts an impressive number of Orthodox churches, almost 100, most of them located in the so-called **Golden Plateau**. The oldest, the **Princely Saint Nicholas Church**, dates from the reign of Stephen the Great (Stefan cel Mare, 1457-1504). The finest, however, are the 17th century **St. Paraschiva Metropolitan Cathedral** and **Trei Ierarhi Church**, the last a curious example of Byzantine art, built in 1635-1639 by Vasile Lupu. Its outer walls and twin towers are intricately carved in what many think of as stone lace.

The city prides itself with publishing the first Romanian newspaper and establishing the first Romanian university. Today, Iasi is home of five universities.
